

## Clues Continued...

About 2/3-way down the road, a signpost's back you'll see.  
Take the path to your left, along the Ledges you'll be.  
At the second picnic table that sits with a grill,  
Head left toward the rocks to have one last thrill.

Step carefully near the edge, another view to behold.  
Look through the crevice to spot the path below.

The connection of the layers is not always seen,  
Sometimes it lies somewhere in between.  
The beauty of nature and culture did mold  
The layers of the Ledges for the young and the old.

Back to the picnic table, left, and mosey along.  
Stay on the main path. At the Y, right is wrong.

Follow an arrow; TO LEDGES TRAIL you must shoo.  
Next, the OCTAGON arrow (left) is meant for you.  
Beneath hemlock boughs, past Sharon honeycomb,  
A second OCTAGON arrow (right) points you home.

Down the wooden steps and head 250 YARDS.  
Watch the ground; one last stop is in the cards.  
Under wood connecting ground with ground  
Is where your treasure box is found.

The box is only for those who quest—  
Help keep it secret from the rest.  
The stamp inside proves you played the game;  
A logbook is for you to sign your name.

When you're done, please close it tight  
And replace the box out of sight.  
We hope *Layers of the Ledges Quest* was fun.  
Take a few more steps and you'll be back to square one.

*This quest was written by Gayle Chryn, a retired kindergarten teacher, and Marilyn Diefendorff, a park volunteer.*

revision date APRIL 2018

## How to Quest

Quest clues and maps—created by teachers, volunteers, and/or park staff—will help you discover the natural and cultural gems of the Ohio & Erie Canalway. At the end of each quest is a hidden treasure box. Sign your name in the logbook, stamp this page, and return the box to its hiding place.

STAMP HERE

**The questing season runs from April 15 through November 15.**

## About This Program

I'm Arrye Rosser, interpretive and education specialist at Cuyahoga Valley National Park. I'd like to thank everyone who helped fulfill my dream of bringing questing to Ohio. This project was made possible by the generous support of a 2010 Parks as Classrooms grant from the National Park Service and is a partnership between many organizations.

So far, more than 100 teachers, volunteers, and park staff have been involved in writing and field testing Canalway Quests. Our plan is to create many more in the years ahead. If you would like to volunteer, contact me at [cuva\\_questing@nps.gov](mailto:cuva_questing@nps.gov)

Special thanks to Emily Bryant and Steven Glazer.

The Ohio & Erie Canalway celebrates the rails, trails, landscapes, towns, and sites that grew up along the first 110 miles of the canal that helped Ohio and our nation grow.

## Canalway Quest

### Layers of the Ledges Quest

Enjoy a moderate hike below and above the Ledges, considering its layers.

## Planning Ahead

This treasure hunt takes about 55 minutes. The trail surface is uneven and sometimes rocky and/or slippery. Insect repellent and hiking shoes are recommended. You will need a pen or pencil to sign the logbook. Some people prefer using their own signature stamp and ink pad or marker.

## Getting There

Start at Octagon Shelter, Truxell/Kendall Park Road, 1.5 miles west of Akron Cleveland Road, Peninsula, Ohio 44264. Park in the upper section of the parking lot and begin this quest at the kiosk.

## Clues

The layers of the Ledges are many and quite old.  
On this quest you're taking, some facts will unfold.  
Rocky paths you will follow with clues that we've written,  
And by the end we hope that you'll be smitten.

Follow two signs for OVERLOOK; 75 steps past the last, stride.  
Pause to look at the massive sloping rock—picture a water slide?

The dark green layer that's soft and furry  
On trees and rocks grows in no hurry.  
In cool, moist areas it thinks it's boss—  
But we all know it's really just moss.

The lighter green upon the rock  
Is alive—it's lichen—don't go into shock!

Lacy hemlocks with their tree roots in search  
Embrace their cool, moist, and rocky perch.  
35 steps past the "slide," look left up the rise.  
A rock groove forming a child-sized 7 lies.

For a stretch ahead as you walk along,  
Listen to the different birds in song.

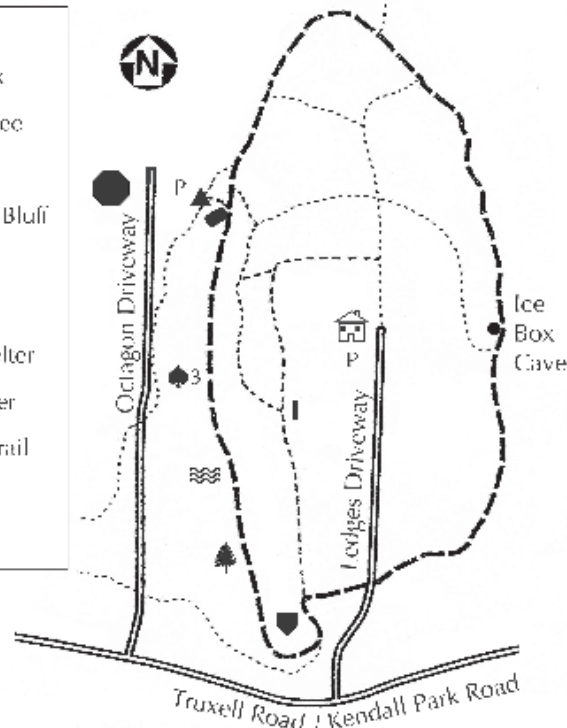

Ahead in the path, a spade-shaped rock you see.  
Look above to see the cover photo's "Points of Three."  
The cliff rock was formed by a fast-moving stream,  
Depositing quartz from the north along its seam.

Sharon Conglomerate this layer is now named—  
Over 300 million years the layer has remained.

### Legend

- ▲ Kiosk
- Sloping Rock
- ♣ 3 Points of Three
- ⊞ Rock Spring
- 🌲 Boulder and Bluff
- 🏠 Overlook
- 📍 Post
- 🏠 Octagon Shelter
- 🏠 Ledges Shelter
- ⋯ Connector Trail
- Ledges Trail
- P Parking

Pebbles and sand once glued together  
Have been washed away by time and weather,  
Leaving a honeycomb pattern behind.  
Keep looking up for more patterns to find.

A braided stream once was flowing,  
Its rippled wave marks now showing.

Take a moment to touch and gaze  
And hope for generations it stays.  
Continue on the trail of sand;  
A forest layer is at your right hand.

Up and down bends, then up stone steps you go.  
Look up to your left—three stone columns show.

Ahead, where the Ledges and sandy floor kiss,  
Water springs forth; its evidence you can't miss.  
Sharon Conglomerate is a sponge-like rock.  
The shale layer below it is a water block.

The seeping moisture through fissures leaks.  
This cool, damp condition is what salamanders seek.

First over the wooden bridge you scoot,  
Then down stone steps you place your boot.  
Take 105 steps from the stair's base and stand  
Where an upright boulder beside the path sits grand.

Once the boulders fit together snug and tight—  
Look up left to see today's jumbled sight.

Here you see from down below  
How the bluffs of the Overlook show.  
On these rocks the trees hold tight,  
Growing up toward the sunlight.

Lacy hemlock\* and straight-growing birch\*—  
A beech\* tree now is what you search.  
Before evergreen hemlocks on the rocky path, stop—  
High on your left is the beech's sprawling top.

- \***Eastern hemlock**—Dark, scaly bark. Soft, lacy needles.
- Yellow birch**—Yellow-gray, paper-like bark. Oval, toothed leaves.
- American beech**—Smooth gray bark. Short trunk and broad canopy.

Now this layer you're leaving, it's higher you go.  
At the signpost, ignore the right-hand path below.  
It's 100 YARDS up the hill. At OVERLOOK, keep right.  
As you walk along the path, a wooden table you'll sight.

Before you pass it, go left through a tree-cut gate  
To reach the Overlook—where the view is top rate!  
West where canopy and horizon meet,  
It's about 7 miles that your eyes greet.

Within the hidden layer below,  
The Cuyahoga River takes a northern flow.  
Left at the edge, the beech is found.  
You saw it below from the ground.

What a different perspective the Ledges take  
When the upper-layer trek you make.

Once you're finished with the view,  
A flat, rocky path waits for you.  
With PITCH IN on right, over flat rocks you go.  
A signpost for ICE BOX on your left will show.

It's straight ahead that you must travel.  
You'll be walking now on a road of gravel.

(A tidbit of information for you to know:  
You're walking on top of a rock plateau.)
